To: Whom it may concerns

Subject: Branding/Packing efficiency

MEDITECH has recently been implement the following changes to increase brand awareness and packaging efficiency on all LOT MFG on JAN 2014 and forward the following changes to increase greater branding and improve efficiency to the packaging

- MEDITECH 10ml injectable vial has change its diameter from 2 cm To 2.4 cm and an decrease in height from 4.5 cm to 4.3 cm, however the vial still hold a 10ml solution. Reference picture A

- To increase packaging efficiency MEDITECH 10ml injectable vial has remove two hologram from its outer box. Reference Picture B

- MEDITECH 10ml injectable outer box has removed a gold stripe from its bottom part to help customer differentiate between top and bottom and also help with logistic purpose. In some products the bottom part will be blank and in some products will be lot number, manufacture date and expire date. Reference Picture C
